Size of Site: 3 acres

Area of Building:
76,000 square feet

Square Foot Cost: \$156

Cost of Construction:
\$11.9 million

Total Project Cost: \$20 million

Contract Date: Dec. 2002

Completion Date: Oct. 2005

Percent of Completion: 100%

The Christine E. Lynn College of Nursing incorporates a nontraditional approach to teaching nursing, using Feng Shui principles to focus on caring and nurturing that balances the wholeness of the individual. The building's architecture and products capitalized on natural light and satisfied many of the requirements of LEED Gold certification.

The overall building design incorporates four key principles:

- **Paradigm Shift:** shifting the paradigm from clinical to caring through the creation of healing spaces;
- **Feng Shui:** ensuring the connectedness of the building to its environment, creating harmony and balance, and using energy in the most positive way;
- **Earth Conscious:** creating an environment that is healthy and supportive to those who grace this space;

COURTYARD AT NIGHT

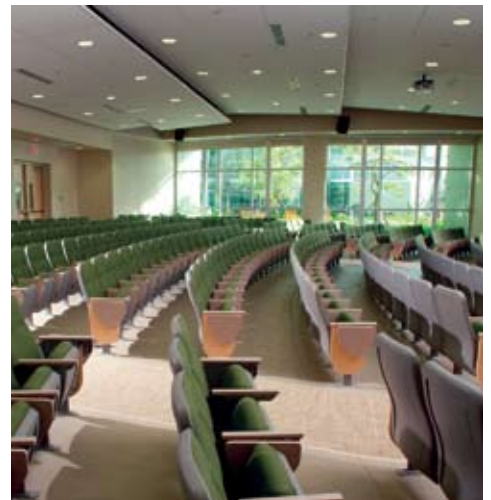

• **Holistic Design Solution:** approaching the building design from an experiential point of view.

The Christine E. Lynn College of Nursing is the first

building dedicated to the nursing program at Florida Atlantic University. Its enrollment averages about 1,300 students in bachelor's, master's, and doctoral courses. ■
