Type of School and
Grades Served:
High School, 9-12

Capacity: 2,950 students

Size of Site: 60 acres

Area of Building:
349,531 square feet

Space per Student:
118 square feet

Cost per Student: \$14,644

Square Foot Cost: \$123

Cost of Construction:
\$43.2 million

Contract Date: Oct. 2003

Completion Date: July 2006

Percent of Completion: 100%

HIGH SCHOOLS

Paul J. Hagerty High School
Oviedo, Florida

SchenkelShultz

ENTRANCE

The new Paul J. Hagerty High School is the realization of more than seven years of planning by the Seminole County School Board and SchenkelShultz. When Lawton Chiles Middle School was built to accommodate the immediate needs of an expanding population, it was designed to be the anchor of a future high school. SchenkelShultz's design for the original middle school placed the campus at one end of the site, leaving 32 acres for the future addition.

The project presented school administrators and staff with a unique opportunity to participate in its design, working alongside the architects to create a cutting-edge educational facility. In addition to traditional academics, the needs of students are met through vocational, arts, JROTC, and technological programs.

Four, two-story academic buildings house core class-

MEDIA CENTER INTERIOR

room facilities. Flexibility is built into the design, enabling the buildings to be organized by grade level or curriculum area. The local community can access the campus for special events in the performing arts

center, gymnasium, and media center.

The seamless integration of the architecture and the magnitude of the buildings announce that this is a high school like no other. ■
