MEDIA CENTER

OUTDOOR LEARNING

PHOTOS: BARRY HALKIN

The new Clinton Township Middle School is designed to support the seventh- and eighth-grade middle school academic program through the creation of a flexible 125,000-square-foot academic space. Team break-out spaces; faculty team-based planning support; and outdoor classrooms, dining, and pre-

sentation spaces all combine to offer a diversified opportunity for learning. Community spaces, including the gymnasium, auditorium, and cafeteria, are located adjacent to each other to support combined usage for large events and secure evening access.

A number of areas in the school are designed to work

independently of, as well as in combination with, others. The music rooms join with the stage to enable a dual educational and performance support role. Team break-out areas adjoin science labs. The media center opens into the courtyard for use as outdoor instructional space or “omni-theater.” ■
